1. Application Overview

The Domino's Pizza website is designed to provide customers with a platform for ordering pizzas and other menu items. The website offers several features to enhance the user experience:

1. **Menu Navigation:** The website features a detailed menu with clear descriptions and images of pizzas, sides, desserts, and beverages.
2. **Customizable Orders:** Customers can personalize their pizzas by choosing from a variety of toppings, crust types, and sizes.
3. **Promotions and Deals:** The site prominently displays current promotions and deals.
4. **Jobs Section:** This section provides information about jobs at Domino's Pizza and allows potential candidates to apply online.
5. **Young Chef Class:** Parents can book a fun and educational pizza-making class for their children.
6. **Nutrition Values:** Detailed nutritional information for menu items, healthy tips, and suggestions.
7. **Stores:** Users can locate nearby Domino's Pizza stores, where each listing provides the address, contact information, and hours of operation.
8. **Large Orders:** Allow placing large orders with information on how to coordinate these orders.
9. **Birthdays and Events:** Customers can plan birthday parties and other events through a dedicated section.
10. **Contact Us:** Provides multiple ways for customers to contact Domino's Pizza.

2. Diagram of the Domino's Pizza website

2. Test Overview

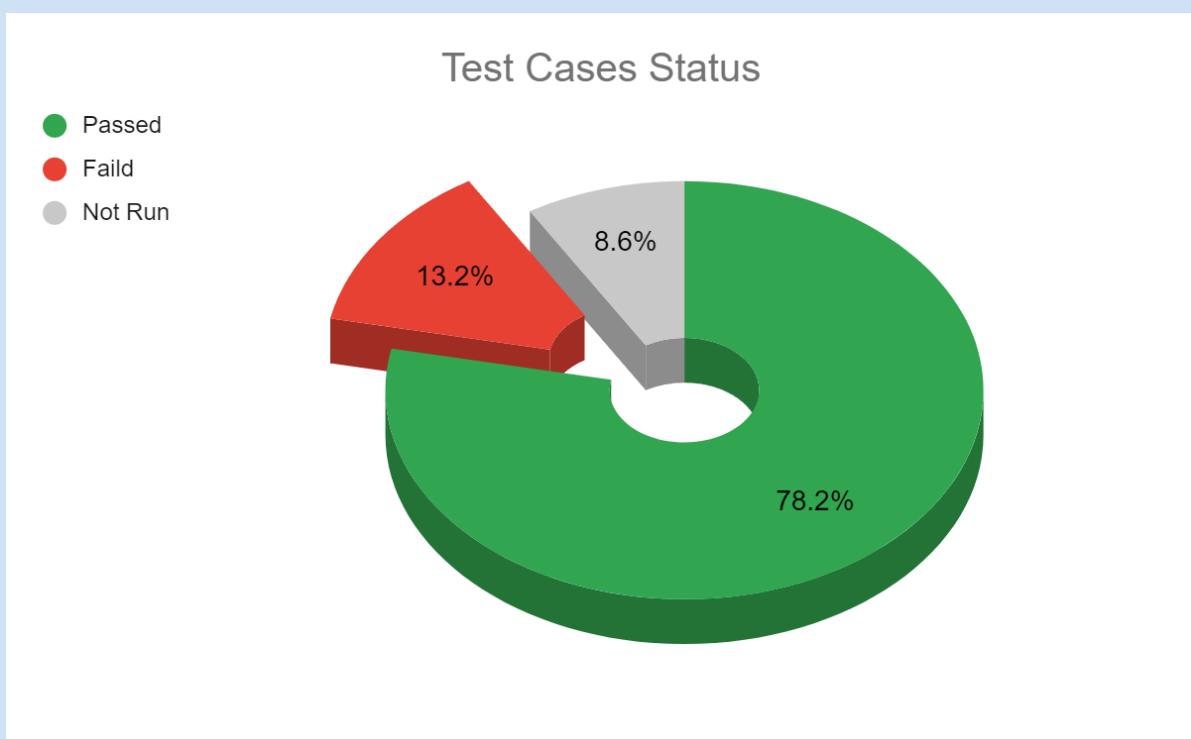

The testing process for the Domino's Pizza website aimed to ensure that all features function correctly and provide a satisfactory user experience.

The tests were carried out on the functions of the site, which refer to all the sections in the application overview, but first of all, the core purpose – ordering pizza.

Each feature was tested for usability, clarity, and functionality to meet user expectations and operational standards.

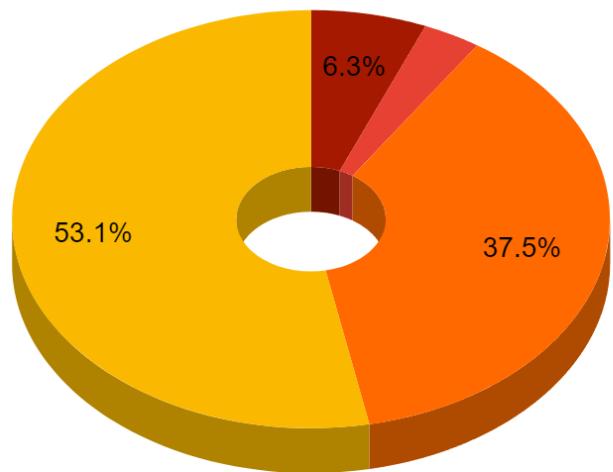

3. Findings and Metrics

During the testing of the Domino's Pizza website, a total of 32 bugs were identified. These bugs were categorized based on their severity and priority levels. The following summarizes the findings:

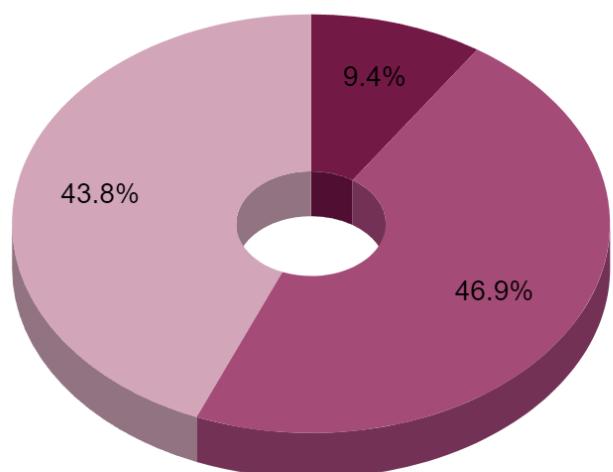

Bug Severity

- Critical
- Major
- Medium
- Low

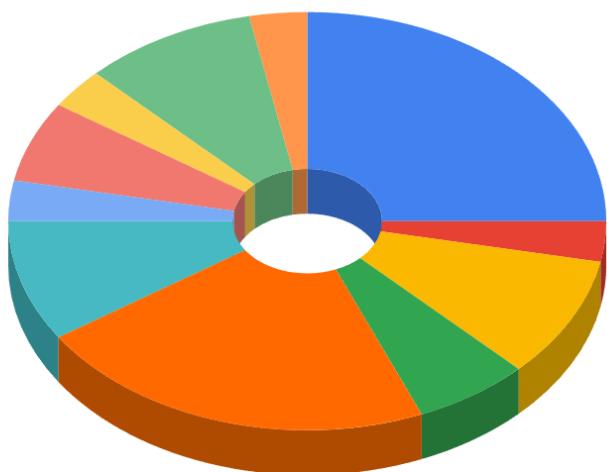

Bug Priority

- High
- Medium
- Low

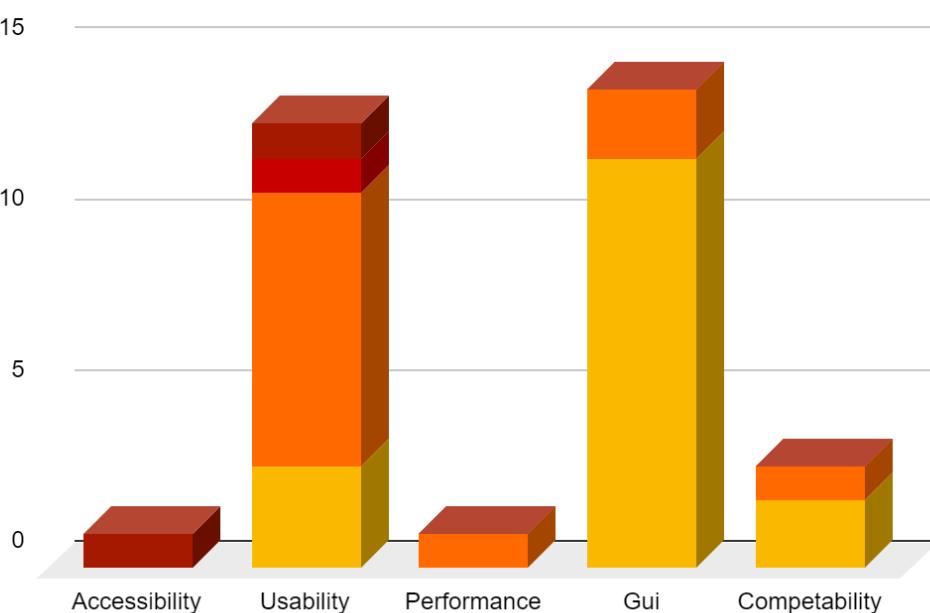

Bug Distribution by Section

- Jobs
- Accessibility
- Nutrition Values
- Yung Chef
- Menu and Order
- English
- My Account
- Big Orders
- Birthdays end Events
- Bottom Bar
- General

Severity by Test Type

- Critical
- Major
- Medium
- Low

4. Recommendations

I want to divide this section into two parts, recommendations about the bugs found on the website and recommendations for enhancing the user experience, although it is not quite a bug to fix.

For the bugs part, while several areas showed issues, the most severe bugs are those found when switching from the default language of Hebrew to English because they are the bugs that affect the user experience the most, at least for the English speaker user. so I recommend starting there.

For the suggestion part, I have two:

- **Allowing users to browse the menu without the need to fill in an address first.** Currently, users must enter an address before they can browse the menu. This requirement can be obstructive, particularly if users want to explore the menu without committing to an order location, such as when coordinating with friends or planning ahead.
- **More contact options as well as contact via WhatsApp.** Currently, the only way to contact the restaurant is via WhatsApp, there is also a phone number, but it is labeled to order only. I recommend adding more customer service options (such as a phone number not only for orders, and email) for those who don't have WhatsApp or can't write for any reason.

5. Conclusion

Despite the identification of several bugs, none significantly affected the core functionality of the Domino's Pizza website – allowing a seamless experience for ordering pizza. Therefore, it is recommended to **proceed with the release of the site.**

Nevertheless, it is important to address the identified bugs. While these bugs do not critically disrupt the ordering process, they affect the overall user experience and could potentially harm the brand's reputation.

6. Bug List

--------------	---

שלוש משפחתיות + שלוש תוספות ב-159, משפחתיות ותוספת ב-71.9
(ושני נלוויים\קינוחים ב-32)

At the **filter**, there are 3 meal deal options available that don't show when there is no filter or when the **filter** is on. (43.5)
שני בריבים ומוצר גלולה ב-86, בריך ופחית שתייה ב-90
(ושני בריבים וצ'יזי רולץ ב-90)

Expected result:

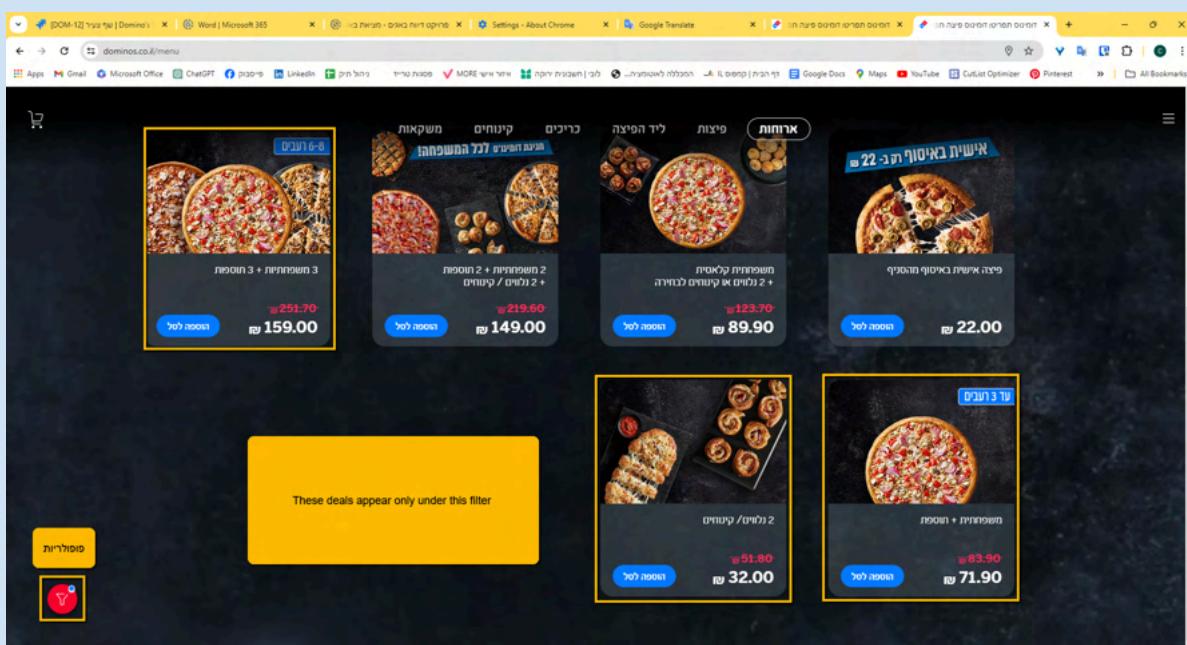

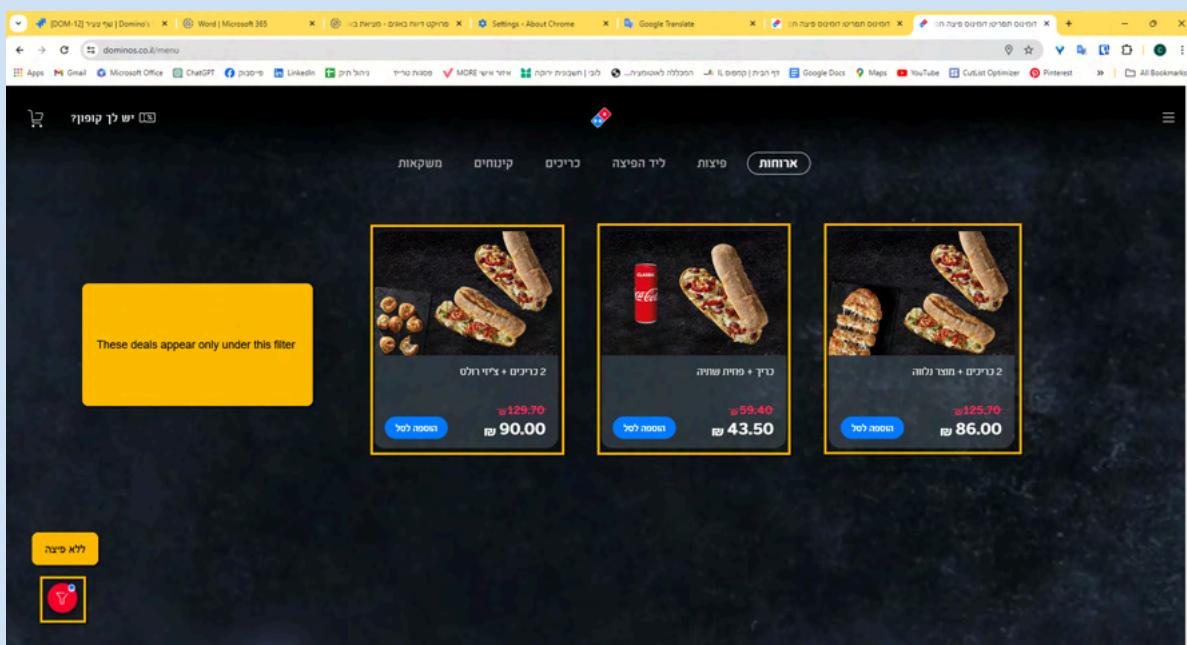

All the meal deals should appear when there is no filter

The screenshot shows the Domino's Israel website menu page. A yellow box highlights the 'No filter' button in the bottom-left corner of the meal deal grid. The grid displays various meal deals with their descriptions and prices in NIS.

Meal Deal Description	Price (NIS)
משפחתיות + מוצר גלולה 51.9	251.70 ₪ 153.00 ₪
משפחתיות + מוצר גלולה 65.9	83.90 ₪ 65.00 ₪
משפחתיות + מוצר גלולה + MIX רולץ	116.80 ₪ 99.00 ₪
משפחתיות ב-40-שרה	143.80 ₪ 80.00 ₪
משפחתיות קלאסית + פיצת או גלולה	97.80 ₪ 82.00 ₪
משפחתיות קלאסית + פיצת או גלולה	123.70 ₪ 89.90 ₪
פיצה אישית באליסון וגבב	219.60 ₪ 149.00 ₪
פיצה אישית באליסון וגבב	22.00 ₪

The screenshot shows the same Domino's Israel website menu page, but with the filter button highlighted in a yellow box in the bottom-left corner. The meal deals are now displayed in a larger grid format.

Meal Deal Description	Price (NIS)
משפחתיות קלאסית + פיצת או גלולה	97.80 ₪ 82.00 ₪
משפחתיות קלאסית + פיצת או גלולה	123.70 ₪ 89.90 ₪

Attachments:	Align 1.png Align.png
Severity:	S3 – medium

Description:	<p>Steps to reproduce:</p> <ol style="list-style-type: none"> 1. Go to Home Page 2. Click on עברית → English 3. Scroll down to the Info pages 4. Click on Spelled Flour Pizza <p>Actual result:</p> <p>The text in the Spelled Flour Pizza is in Hebrew, some of the lines align to the right and some to the left.</p> <p>This problem also appears on most Info pages, including the Terms and Info and Accessibility.</p>
--------------	---

Other sections that stay in Hebrew but their alignment stay the same are – **Jobs**, **Young Chef** and **Nutrition Values**.

Expected result:

After changing the language to **English** the pages should be in **English**

If the pages are in **Hebrew**, all the text should align to the right.

A screenshot of the Domino's website in Hebrew. The main navigation bar at the top includes 'Delivery' and 'Pickup' buttons. Below the header is a large image of a pizza. A yellow arrow points from the text 'Align to the left' in the original image to the word 'Spelled Flour pizza' in the Hebrew version, which is enclosed in a red rectangular box. The page features a phone number '1-700-70-70-70' and various pizza categories listed below the main menu.
